## Document Change Log

Date	Version Number	Author	Change Description
March 22, 2022	1.0	Security Team	Updated Title of Handbook and date updated. (Release 3)

## **Cardinal Security Handbook**

Each agency is established as a Business Unit in Cardinal and each user in Cardinal is assigned a Row Level Security permission list. This permission list determines the Business Units that the user can access. The purpose of Row Level Security is to prevent users from being able to modify or view data for other agencies. A user can only view, enter, or process transactions for Business Units included in their Row Level Security permission list.

Cardinal users need to be assigned the appropriate roles and security settings in the Cardinal System to have access to do their jobs. This Cardinal Security Handbook is designed to help agencies determine the correct roles for Cardinal users.

### **Cardinal Security Officers (CSO)**

The Cardinal Security Officers listed on the Department of Account (DOA) Authorized Signatories Form (DA-04-121) have been granted authority to authorize the Cardinal Security Team to add, update and delete users in Cardinal that are both preparers and approvers of transactions in Cardinal. By approving a transaction in Cardinal, the agency, department or institution, and its employees and agents, agree to the certifications contained in the Commonwealth Accounting Policy and Procedure Manual for the applicable transaction.

### **Cardinal Security Form**

The Cardinal Security Form must be completed by the applicable agency's Cardinal Security Officer (CSO). The form should include required signatures prior to submitting to the Cardinal Security Team, in order for access to be granted in Cardinal.

The Cardinal Security Form can be found in the Statewide Toolbox tab on the Cardinal website using the following path:

**Statewide Toolbox > Cardinal Security > Cardinal Security Form (SE-SW-001)**

Use this form to:

- Assign users to roles within Cardinal
- Update existing Cardinal user information
- Lock out users no longer requiring access to Cardinal

The Cardinal Security Officer will submit the completed form to the Cardinal Security Mailbox at: [cardinal.security@doa.virginia.gov](mailto:cardinal.security@doa.virginia.gov)

### **Cardinal User Roles**

Use the Cardinal Security Handbook as a reference when completing the Cardinal Security form. It defines Cardinal roles by functional area.

You will find the following information in the handbook regarding Cardinal roles:

- Role descriptions
- Segregation of duties
- Other role considerations

## Cardinal Row Level Security

Row Level Security permission lists grant the user access to view, enter or process transactions (as authorized via the corresponding Cardinal User Roles) for all Business Units included in the Row Level Security permission lists. For information on these lists, please reference the Cardinal Row Level Security spreadsheet on the Cardinal Project Website.

When requesting access to Row Level Security designated as a “Statewide Access Group”, it is the Agency Cardinal Security Officer’s responsibility to ensure Agency Management is aware of, and concurs with, the user’s need to access statewide information in order to perform assigned job duties. The agency also acknowledges adequate procedures and internal controls have been implemented at the agency to help ensure all extracted/downloaded data is stored and maintained in accordance with VITA Information Technology Resource Management (ITRM) Standard SEC501-09.

In addition to the requirements stated above, any Cardinal Security Form requesting access to a Statewide Access Row Level Security permission list will require approval/signature from a designated Cardinal DOA Approver.

### ***Segregation of Duties Policy Exceptions:***

Several combinations of Cardinal security roles have been noted as potential segregation of duty (SOD) conflicts in this handbook. As a general rule, SOD role combinations will not be granted to Cardinal users. Exceptions can be requested for agencies where limited staffing is available or special circumstances exist. Before completing or submitting a security form where an SOD role combination conflict is being requested for a user, the agency should first complete the following steps in order to obtain approval for an agency SOD conflict exception.

- Submit a written request to DOA’s Director of General Accounting (email:[gacct@doa.virginia.gov](mailto:gacct@doa.virginia.gov)) that includes:
  - Exception requested
  - Justification for the exception
  - Description of the internal control implemented by the agency to mitigate the lack of segregation of duties
  - Approval (signature) from your Agency Head
- DOA General Accounting will notify the agency in writing if the exception is granted.

Once the SOD Exception has been approved by DOA General Accounting, the agency should take the following additional steps when submitting a Cardinal Security Form (SE-SW-001) for any user requesting SOD conflicting role combinations:

- Complete the Cardinal Security form (flagging the SOD Exception), attach a copy of the DOA General Accounting notification granting approval of the **applicable** agency exception
- Scan and email the form and exception approval notice to DOA’s Director of General Accounting (email:[gacct@doa.virginia.gov](mailto:gacct@doa.virginia.gov))
- If approved, DOA General Accounting will sign the form, scan and email the approved form to Cardinal Security at [cardinal.security@doa.virginia.gov](mailto:cardinal.security@doa.virginia.gov) and to the Cardinal Security Officer for that agency

## Accounts Payable User Roles

Accounts Payable (AP) is the main source of all non-payroll payment information for a financial entity. AP includes the following processes:

- Establish and Maintain Vendors
- Enter and Process Vouchers
- Expense Processing
- Process Payments
- Process 1099

### ***About this Section***

This section outlines the available roles for AP in Cardinal. Use the AP User Roles and Descriptions Table below to determine the appropriate AP roles needed by agency users in Cardinal.

The AP User Roles & Descriptions Table provides the following information:

- Role Descriptions
- Segregation of Duties
- Other Role Considerations

## Accounts Payable Workflow

### *About this Section*

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level for action (approve or deny).

### Expenses Workflow

Expense transactions are routed for approval based on Department IDs

The following Expense role(s) are tied to workflow:

- Expense Approver

As a general rule, only employees assigned to the Expense Approver role because it deals with the approval of expenses. Non-employees cannot be assigned to this role. When an expense transaction is entered for an employee, the person who is identified in Cardinal as their supervisor in their expense profile will be the first level of Cardinal approval for online agencies with Expense Workflow Option 1. The supervisor approver level does not apply for agencies with Expense Workflow Option 3 and for interfacing agencies.

Please use the information provided below to select the appropriate Expense Approver workflow profile for your users in Cardinal and list the department ID ranges for which the user will approve. **A user can only be assigned to one of the below expense approver profiles and only one user per profile/department range combination.**

Expense Approver Profile	Profile Description
Fiscal Officer	Approval of all expense reports, travel authorizations, and cash advances. This approval level is optional for online agencies.
Agency Head	Approval of expense reports and travel authorizations containing expense amounts over the allowable amount and/or over \$1000. Interfacing agencies will not have the Agency Head approval level in Cardinal.
DOA Pre Audit	Approval of expense reports for Capital Outlay projects. This role may only be selected by employees of the following agency(s): Department of Accounts – General Accounting

### ***Voucher Workflow***

Users assigned the following role will be assigned the agency specific route control profile(s) in order to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

- Voucher Approver or Final Voucher Approver

If the user is assigned to the Voucher Approver or Final Voucher Approver role, agencies will need to identify the Business Unit number(s) for which that user can perform approvals. Please note, the Final Voucher Approver role is only applicable to agencies that have previously selected two levels of voucher approval.

## Accounts Receivable User Roles

Accounts Receivable (AR) is the functional area that handles a series of accounting transactions dealing with funds receipts. AR includes the following process:

- Enter Funds Receipts

### ***About this Section***

This section outlines the available roles for AR in Cardinal. Use the AR User Roles & Descriptions Table below to determine the appropriate AR roles needed by agency users in Cardinal.

The AR User Roles & Descriptions Table provides the following information:

## General Ledger Workflow

### *About this Section*

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level to approve or deny. The GL Journal Approver is tied to workflow.

Users assigned to the following role will be assigned the agency specific route control profile(s), to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

- Journal Approver

If the user is assigned to the Journal Approver role, agencies will need to enter the Business Unit(s) for which that user can perform approvals.

## Additional User Roles

The additional roles that follow relate to reporting, queries, PeopleSoft user system setup and Special Approval roles.

### About this Section

This section outlines additional roles in Cardinal. Please use the Additional User Roles & Descriptions Table below to understand the roles all Cardinal users will receive.

The Additional User Roles & Descriptions Table provides the following information:
