

**Maintaining Employee Tax Information Overview**

In Cardinal, every employee must have a Federal, State and Local (if applicable) tax record set up. Employees with multiple jobs within the same company will have one tax record for both jobs. Employees with multiple jobs across agencies will have one tax record for each company. When an employee record is added in Cardinal, the tax information defaults to Single and 0 for the employee's Federal taxes and for the applicable residential state taxes.

Every employee must also have a **Tax Distribution** record. The **Tax Distribution** record is at the employee job record level, so if the employee has two jobs within the same company, there will be a separate **Tax Distribution** page for each employee record.

Once an employee submits the required tax forms, Payroll Administrators review the form for accuracy and then make the updates online in Cardinal. This Job Aid provides the steps used by Payroll Administrators to maintain employee tax information.

**Navigation Note:** Please note that there may be a **Notify** button at the bottom of various pages utilized while completing the processes within this Job Aid. This "Notify" functionality is not currently turned on to send email notifications to specific users within Cardinal.
