

Managing Position Data Overview

Positions are required and tracked, whether they are vacant or filled. Agencies will continue to utilize Agency-specific systems or paper forms outside of Cardinal to capture position information and route for approvals (e.g., agency budget, HR approvals) within the Agency. The Position Number is unique for each Agency and begins with the Cardinal three-digit Company code that represents the Agency. The Position Number is needed before adding or cloning a position.

Positions are created before an employee is hired. Once hired, an employee is associated to the position for which they were hired, and additional job data information is completed. The job data information inherits the position data that is selected at the time of adding a new hire or when moving an employee into a new position. Details or information regarding the position are first changed at the position level and are then conveyed to the associated employee's job data record.

Positions are created for all employees. Cardinal position management supports Human Resources, Benefits, Time and Attendance, and Payroll. COVA uses positions to track the details of a specific job in a department or location that typically has a one-to-one relationship with employees. On occasion, there may be multiple employees using the same Position Number. If the position headcount is less than the number of employees, a warning message will appear on job data. Data is attached to the positions, and employees move in and out of those positions. If a Pay reduction is required, make sure it is in accordance with DHRM Policy 1.60 and 3.05 and use Position action of POS/DIP.

If a new Job Code is required, work with DHRM to add the required Job Code prior to entering the new position. If a Job Code is changed on a position that affects an incumbent, it may be necessary to then enter the related compensation change on the incumbent's job record.

If position level funding is utilized, review the ChartField distribution when changing position attributes using the Job Aid titled **HR351_Position ChartField Assignment and Update**. This Job Aid can be found on the Cardinal Website in **Job Aids** under **Learning**. This data is exclusively maintained by employees with security access to the Department Budget Table.

Navigation Note: Please note that there may be a **Notify** button at the bottom of various pages utilized while completing the processes within this Job Aid. This "Notify" functionality is not currently turned on to send email notifications to specific users within Cardinal.

7/25/2025	Added an explanation note in Section 3 after Step 10 regarding a new Position Effective Date error.
12/3/2024	Baseline.

Creating a Position

Use this process to create a new position in Cardinal.

Step	Action
1.	<p>Navigate to the Manage/Create Position page using the following path: NavBar > Menu > Organizational Development > Position Management > Maintain Positions/Budgets > Manage Position</p> <p>The Manage/Create Position page displays.</p> 
2.	<p>Click the Add button.</p> 
	<p>The Create Position page displays.</p> 
3.	<p>Enter the applicable Position Number in the Position Number field.</p> 

Step	Action
	Do not use the ORP designator in any Position Number for active employment as this is reserved for ORP retirees and will result in data being omitted from queries and extracts.
4.	<p>The Effective Date field must be updated to the applicable effective date for the new position as needed using the Calendar icon and must be:</p> <ul style="list-style-type: none"> a. Greater than or equal to the effective date of the position's Job Code (which is maintained by DHRM) <p>AND</p> <ul style="list-style-type: none"> b. Less than or equal to the effective date of any employee job transaction(s) 
	For further information on effective dating, refer to the Job Aid titled HR351_Overview of Effective Dating . This Job Aid can be found on the Cardinal website in Job Aids under Learning .
5.	<p>Click the Continue button.</p> 
<p>The Create Position page displays with the Position Data Step 1 of 4 displayed by default.</p> 	
	<p>Various fields can be (or must be) entered on the Position Data Step 1 of 4 of the Create Position page. It is important to review all the fields on each step (in order) as some fields are dependent on others. Review the following tables for information related to each field.</p>

Updating Position Data When an Incumbent Exists

Before making position changes, check the employee's job data to determine the date of the top row. The effective date of the position change must be after the highest dated job data row for the change to properly flow over to the employee's job data. In the image below, the top row will flow to the employee's job without requiring a help desk ticket. The second row requires a help desk ticket to be submitted to make the change. It is important to review the effective date of an employee's highest job data row.
